Github

## Certification:-

Microsoft Azure (AZ-900)

Java basic - [Java Basic](#)

Sql basic - [Sql](#)

## LANGUAGES

English and Hindi

## Projects:-

### Resume Builder -

Technology: HTML CSS Javascript

**Description:** I developed a dynamic Resume Builder application using HTML, CSS, and JavaScript, equipped with an innovative feature set to enhance user experience and optimize job application success. This tool not only assists in crafting personalized resumes but also provides tailored job descriptions and project recommendations based on individual skill sets and career aspirations. [Link](#)

### AI Bot-

Technology: HTML CSS Javascript

**Description:** Developed an AI bot using HTML, CSS, and JavaScript with integration of the Gemini API for enhanced functionality. Utilized the Gemini API to enable real-time data retrieval and interaction with external systems, enhancing the bot's capabilities. Demonstrated proficiency in API integration, asynchronous programming, and problem-solving to deliver a high-quality, functional product tailored to user needs. [Link](#)

### Hackerrank Clone-

Technology:- HTML CSS Javascript

Team: 4

**Description:** Collaborated with a dynamic team of four to create a fully-functional HackerRank clone. Developed responsive web pages using HTML, CSS, and JavaScript to ensure a seamless user experience across devices. Implemented an additional feature – a coding playground – to enhance the platform's utility. The project involved close coordination with team members, iterative development, and a focus on delivering a high-quality, feature-rich coding environment. [Link](#)

**My Role:** Served as the team captain, guiding and coordinating the team's efforts. Led decision-making processes, ensured effective communication, and took a hands-on approach to front-end development tasks. Specifically, led the integration of the coding playground feature.

### Home Decor:-

E-Commerce Website on Home decor E-learning application (Capstone) Developed and built an e-commerce website that offers a wide range of elearning courses to end-users
